

## MAKE YOUR MOVE

Incredible Technologies (IT) is ushering in the next generation of Incredible innovation with the launch of its brand-new platform and core cabinet, Prism VXP™. Prism VXP redefines the expectations of core gaming because the technology and design utilized, both inside and out, are undeniably premium.

Prism VXP integrates three crystal-clear displays into the game, delivering thrills at every glance. Primary gameplay takes place on a 27" 4K display, featuring edge-to-edge graphics at eye level for maximum comfort. Just below sits the giant 18.5" PrismDeck which extends gameplay beyond the main display, right to the players' fingertips and showcases a wide variety of bets and denominations. The 55" 4K VXP display is located behind the primary screen, providing a stunning and interactive backdrop... with a show-stopping twist.

VXP – it's **V**ertical **eXP**ansion! In an unprecedented move, the VXP display utilizes a commercial-grade motor to physically expand upward, extending game play over 13 inches! The VXP feature is showcased during bonus events and big win celebrations, ensuring double takes from every corner of the casino.

Founded in flexibility, Prism VXP features an integrated game stand and can be paired with the brand new PrismFlex Edge™. The PrismFlex Edge features a slim 4K video display and an integrated curved pedestal to create space between games in a dynamic fashion. The PrismFlex Edges also utilize new PrismFlex Technology, providing 105 degrees of movement and allowing for a near-infinite number of bank configurations. From statement Sawtooth banks to pole wrapping carousels, the PrismFlex Edge and PrismVXP are an unstoppable pair on casino floors.
